

We're solving for the need for high-quality, American-made face masks.

From high-quality masks to the precision-designed machines that make them, we're applying over 115 years of American engineering expertise and a reputation for service to make PPE we can all count on.

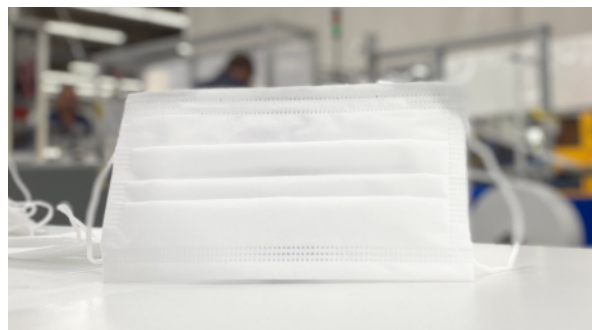

WHAT WE DO

Mask Production Machines & Service

Equipping manufacturers with expertly-engineered, American-made mask production machines and reliable service.

Mask Sales & Supply

High-quality, ultra-comfortable face masks that help our customers keep their employees and customers safe.

Private-labeling & Contract Manufacturing

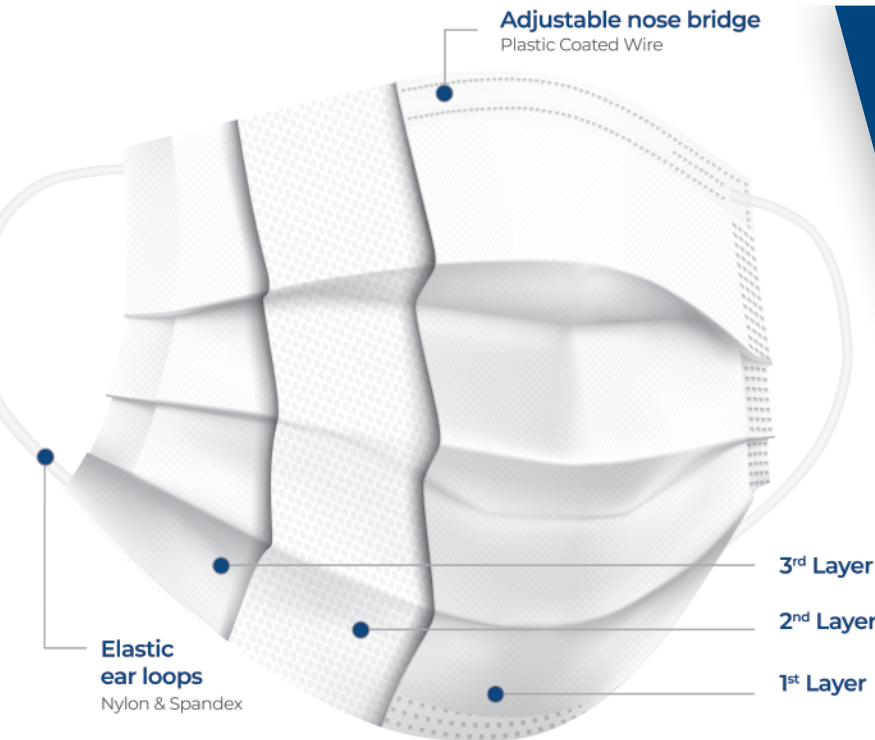

Localizing and amplifying supply and production in a time of heightened customer demand.

Materials Testing

Helping innovators and mask producers test and pilot new designs and materials.

What sets us apart?

High-quality, ultra-comfortable masks reliably and locally-supplied.

Tested against the highest industry standards for efficacy and delivered direct from our facility in Itasca, Illinois.

LAYERS

- 1 **Outer barrier** Nonwoven Spun-Bonded Polypropylene
- 2 **Middle filtration** Melt-Blown Polypropylene
- 3 **Inner comfort** Nonwoven Spun-Bonded Polypropylene

Precision-designed mask production machines engineered, manufactured and tested entirely in the U.S.

- 100 and 200 mask per minute output
- High-quality components for high-volume production
- Fully automatic, complete solution
- Professional installation, service and training

ABOUT **RDI** MEDICAL

We're in it for the long term.

As part of The RDI Group, we've been using advanced engineering, creative design and industrial experience to solve challenging problems for more than 115 years.
